

Formal Complaint

Re: Competitor #16 - Result in Task #2, Flight 1, May 28, 2022

This is a formal complaint regarding the result received of Competitor 16 on Task #2. The task was a FON which had 2 methods of declaration prior to the achieved result in Task 1:

1. Declared on write in at end of briefing, or;
2. Text to 505-620-2190

The competitor texted: "Heavin 16, 4560-0400" to the phone number "505-620-2199" at 6:40am prior to launch.

The competitor was Not measured to the goal due to an error of mis-typing/fat-fingering the last digit of the phone number.

There is no advantage to texting to an inadvertent phone number prior to launch. The one digit difference is an obvious technical error. There is clear evidence that the intended target coordinates were sent in a timely manner. We should strive to consider evidence in light of technical issues.

I believe the intent here was clear and am requesting to be scored to the Goal that was texted.

Thanks,

Gary Heavin
